These instructions apply to the following kit:

101705503

GENERAL INFORMATION AND PRECAUTIONS

This publication provides detailed instructions for the installation of headlights on gasoline and 36-volt electric DS Golf, Tourall, Fairway Villager, and Villager 4 vehicles. This kit requires the installation of a 12-volt brake relay. **See following NOTE.**

NOTE: One of two types of relays are included in this kit. Verify the relay included in this kit is the correct voltage rating for the vehicle.

If the last two digits of the relay model number are 12, **OR** if it has a green oval sticker, then it is a 12-volt relay required for gasoline and 36-volt vehicles only and required for this kit (**Detail A**).

If the last two digits of the relay model number are 48, **OR** if the 5th and 6th digits of the relay model number are 4 and 8, then it is a 48-volt relay (**Detail B**) (**Figure 1**).

Figure 1 Verify Relay Voltage Rating

The following safety statements relate to specific safety issues and must be read, understood, and heeded before a kit is installed. Failure to do so could result in personal injury and/or property damage.

⚠ DANGER

- **Battery – Explosive gases! Do not smoke. Keep sparks and flames away from the vehicle and service area. Ventilate when charging or operating vehicle in an enclosed space. Wear a full face shield and rubber gloves when working on or near batteries.**
- **Battery – Poison! Contains acid! Causes severe burns. Avoid contact with skin, eyes, or clothing. Antidotes:**
 - **External:** Flush with water. Call a physician immediately.
 - **Internal:** Drink large quantities of milk or water. Follow with milk of magnesia or vegetable oil. Call a physician immediately.
 - **Eyes:** Flush with water for 15 minutes. Call a physician immediately.
- **Gasoline – Flammable! Explosive! Do not smoke. Keep sparks and flames away from the vehicle and service area. Service only in a well-ventilated area.**
